Art Unit: 2154

## **DETAILED ACTION**

1. Claims 28-38 are subject to examination. Claims 1-27 are cancelled.

## Election/Restrictions

2. Newly submitted claims 28-38 are directed to an invention that is independent or distinct from the invention originally claimed (cancelled claims 1-27, Group I invention) for the following reasons:

The newly presented claims 28-38 of Invention Group II, are drawn to an ATM which contains web browser to provide user access to a public Internet by blocking access by the web browser, and the web browser sending requests over the public Internet to an agency, which responds to the requests by sending actuation messages to the ATM over the public Internet along with a financial switch, and a web server which communicates with the public Internet, and the web server providing a response to the actuation message in order to handle printer instructions and the ATM to print particular type of information on paper or to utilize the public Internet for a print-controller for diverting the print material, which the Invention Group I is lacking. The Group II invention is classified in Class 709 subclass 219.

Since, inventions I and II have different functions, different modes of operation and they have different effects, these inventions are distinct for the reasons given above, and the search required for Group II is different and not co-extensive for examination purpose, because it would require different search on PTO's classification class and subclass.

Also, PTO does not permit shift to another invention in the middle of the invention being prosecuted, as MPEP 819, states the following:

Application/Control Number: 09/691,553

Art Unit: 2154

The general policy of the Office is not to permit the applicant to shift to claiming another invention after an election is once made and action given on the elected subject matter. Note that the applicant cannot, as a matter of right, file a request for continued examination (RCE) to obtain continued examination on the basis of claims that are independent and distinct from the claims previously claimed and examined (i.e., applicant cannot switch inventions by way of an RCE as a matter of right). When claims are presented which the examiner holds are drawn to an invention other than the one elected, he or she should treat the claims as outlined in MPEP § 821.03.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 28-38 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

## Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Haresh Patel whose telephone number is (571) 272-3973. The

Application/Control Number: 09/691,553

Art Unit: 2154

examiner can normally be reached on Monday, Tuesday, Thursday and Friday from 10:00 am to

Page 4

8:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, John Follansbee can be reached on (571) 272-3964. The fax phone number for the

organization where this application or proceeding is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
